

About the Morgan Lens

www.morganlens.com

The Morgan Lens is the most effective, comfortable, and easy to use eye irrigation system available, quickly treating ocular chemical burns, removing non-embedded foreign bodies, or delivering medication. Inserted in less than 20 seconds, it provides hands-free irrigation, freeing medical personnel to treat other injuries. Floating on the irrigation solution it provides and never touching the cornea, the Morgan Lens efficiently irrigates all regions of the eye, and even allows for continuous treatment while the patient is being transported.

- Used in over 95% of hospital emergency departments in the USA
- Proven effectiveness through millions of uses
- Recommended & referenced in over 100 papers, protocols, and books
- Specialists in eye irrigation for over 40 years

Past Performance
